## INTRODUCTION

This Catalogue contains a provisional listing of statistical data collections conducted by Commonwealth Government departments and authorities.

The Catalogue is divided into two sections: Part 1 refers to collections undertaken by the Australian Bureau of Statistics (ABS); and Part 2 refers to collections undertaken by other Commonwealth departments and authorities. In both parts of the Catalogue collections have been arranged according to their subject matter and classified to ABS program codes. Collections included in Part 1 have been further classified to ABS project codes.

Each entry refers to a different statistical collection, and for each collection the following items of information are recorded:

- . title or description of collection;
- . type of collection (including frequency and method of collection);
- . collection authority; and
- . availability of information (including title(s) of publication(s)).

Information in Part 2 of the Catalogue was obtained from a preliminary survey of Commonwealth departments and authorities conducted by the ABS in January 1979. The survey sought descriptions of collections of identical items of information from ten or more informants, which were being undertaken continuously or at regular intervals as at 31 December 1978, or which had been undertaken wholly or in part during the three years preceding that date. A distinction was made between primary data collections and collections derived by aggregating information from other official data collections; only descriptions of primary data collections were sought. Similarly, details of statistical activities other than data collection - such as analysis and model building - were not sought.

It should be noted, however, that this provisional listing may contain some collections in Part 2 which should be excluded because they are outside the scope of the Catalogue, and may be incomplete with respect to coverage of other collections, in particular those conducted by State or regional offices of departments.

F O O T N O T E S

- (a) The first comprehensive collection of structural and transactions data for the construction industry is to be conducted in respect of 1978-79. It is planned to conduct the collection at 5-yearly intervals.
- (b) It is tentatively planned to conduct the first Transport Census in respect of 1982-83, and to repeat the Census at 5-yearly intervals.
- (c) This is a "joint collection" which varies considerably between States in concepts and coverage.
- (d) This is a national collection conducted by the SA Office of the ABS. The WA Office collects separate details of sales of WA wine.
- (e) This collection is conducted once in the interval between periodic national retail censuses.
- (f) A full retail census was conducted in respect of 1968-69 and a truncated retail census in respect of 1973-74. Further retail censuses are planned for 1979-80 and at 5-yearly intervals thereafter.
- (g) The last wholesale census was conducted in 1968-69. Future wholesale censuses are tentatively planned for 1981-82 and at 5-yearly intervals thereafter.
- (h) For collections in this program/project data are released to selected government authorities on a monthly or quarterly basis, but published generally less frequently.
